

HIGHLAND PROPERTY SERVICES

Dear Homeowner,

With regards to the implications of risk adjusted Lockdown Level 3 for the tourism industry which permits travelling and accommodation bookings for work purposes or the specific provisions stipulated in the legislation. We've noticed that some homeowners have started preparing to rent out their homes by adhering to the legislation protocols and putting hand sanitizers, screening equipment and records registers.

HPS is committed to adhering to protocols as well as providing an advanced, SANAS accredited service to disinfect/fumigate your houses before you rent them out. We now have an additional service called Commercial Enviro & Covid-19 Shield - the science of disinfecting.

HPS has entered into a joint venture with the company that provide advance German science in organic, harmless and safe formula of disinfecting premises using Nanotechnology substances.

Your house will be COVID-19 free for up to 3 months and you will have the added benefit of being legally compliant by way of a certification which will be visible to your guests when they book your house.

Please see the product details, benefits and what makes it exceptional from all other Alcohol disinfecting products below:

HPS Enviro & Covid19 Shield – The Science of Disinfecting & Fumigating

This is a revolutionary new system that combines a unique disinfecting mist or fogging sprayer process with an equally unique and organic disinfecting product, Nanotechnology disinfectant and sanitiser. The unit uses an electrostatic charge applied to the spray, causing a natural attraction between spray droplets and target surfaces.

The fogging spray evaporates easily on surfaces and can be used in high clutter areas and “touch areas” such as desks, papers, phones, restroom surfaces, etc.

Nanotechnology Disinfecting Products

The product is safe for all commercial environments and facility occupants:

- The product combines the benefits of hydrophobic and anti-bacterial materials in surface coating, which helps prevent bacteria growth on wet and dry surfaces.
- The hydrophobic anti-bacterial surface coating can last up to 3 months preventing bacteria from growing.
- It has Hand Sanitizer that contain silver complex which ensures a long-lasting protection on hands, unlike the alcohol-based sanitizer that loses protection when alcohol evaporates.
- The product offers water based anti-bacteria additives for fabric and textile treatment, plus one for treating leather and kills 99,99% of germs.
- The wide range of NanoWorks Premium Biocide Complexes are created as anti-bacterial materials which are effective against enormous array of disease- cause pathogens (including methicillin and vancomycin-resistant strains) bacteria, yeast, fungi, germs, unicellular parasites, viruses and protozoa etc.)
- Pathogens are anaerobic organisms that can survive even in the absent of oxygen and their metabolic functions is dependent on certain enzymes, therefore NanoWorks Biocide Complex targets those primarily enzymes.
- Even though enzymes causing bacteria are destroyed, the good bacteria (aerobe) is not harmed because these biocides have no adverse effect on human health, animals and plants.
- These Anti-bacterial additives products can be used in any coating for any surfaces i.e. floors, work surfaces, food preparation areas, metal, textile, wood, ceramic, glass, paper, clear coats, paints, fibre, lacquers, water and other liquids or surfaces and many more uses.

DISINFECTANT COMPARISON

Our Organic Disinfectant	Conventional Disinfectant
Kills 99.9999% of all germs, viruses, bacteria, fungi and parasites	Kills 99.99% of germs, viruses and bacteria, provided alcohol 70%+ content (no fungi kill)
Kill time: 5-15 seconds	Kill time - 5-15 seconds
Non Toxic - no side effects	Toxic if overdosed with side effects
Non-Flammable	Flammable
Organic (no chemicals)	Chemicals
Protection last up to 3 month on all surfaces	No long lasting protection
Safe to the skin's natural oils	Destroy skin's natural oils
Does not burn skin	Burns the skin (especially if overused)
Occurs naturally in the human body	Foreign to the human body
Can be applied on open wounds	Should not be applied to open wounds
Does not cause skin irritation	Can cause skin irritation
Safe to use for all ages (baby rashes, etc)	Age dependant
Can be used around and in the eyes	Should not come near the eyes
Safe if digested accidentally in small dosage	Potential harmful if digested
More PUNCH (Powerful) against pathogens	Less powerful against pathogens

THE HEALTHY CHOICE

Please contact us for more enquiries and quotations, we are prepared and ready to render this quality guaranteed service to you.

Kind regards
HPS Management.
